

CMSC 414: Computer and Network Security

Spring 2021 Course Syllabus

Instructor: Dr. Irfan Ahmed
Office Location: Virtual via Zoom (the zoom link is available on Canvas)
Office hours: Monday and Wednesday between 10:00 am and 11:00 am
or by appointment.
Email: iahmed3@vcu.edu

Overview (Catalog Course Description):

Semester course; 3 lecture hours. 3 credits. This course covers a wide range of computer network attacks and defenses.

Course Prerequisites:

CMSC 312 - Introduction to Operating Systems

Class Meeting:

Virtual via Zoom from 5:30pm to 6:45pm on Monday and Wednesday.
The zoom link is available on Canvas.

Textbook:

- *Network Security Essentials: Applications and Standards* by William Stallings, Pearson; 6th edition, 2016
- *Computer Networking: A Top-Down Approach* by James Kurose and Keith Ross, Pearson; 7th edition, May 2016

Reference Books:

- *Penetration Testing: A Hands-on Introduction to Hacking* by Georgia Weidman, 2014
- *Black Hat Python: Python Programming for Hackers and Pentesters* by Justin Seitz; No Starch Press; 1st edition; Dec, 2014
- *Attacking Network Protocols: A Hacker's Guide to Capture, Analysis, and Exploitation* by James Forshaw; 1st Edition, Dec 2017
- *Hacking Exposed 7: Network Security Secrets and Solutions* by Stuart McClure, Joel Scambray, George Kurtz, McGraw-Hill Education; 7 edition, 2012

Grading:

Midterm Examination	15%
Final Examination	15%
Assignments	50%
Project	20%

Grading Scale:

The following grading scale is used. I never curve. Grading in college courses is objective and based directly on your performance. Please don't ask me to change your grade on an assignment unless you clearly deserve it and can demonstrate that this is the case.

A	90-100	B	80-89	C	70-79
D	60-69	F	0-59		

Tests:

There will be one midterm and one final. The final examination is based on the material covered after the midterm. Any missed test will receive a grade of zero unless arrangements are made with me.

Midterm Exam Date: March 17, Wednesday at the class time (5:30 pm ~ 6:45pm)

Final Exam Date: May 10, Monday at the class time (5:30 pm ~ 6:45pm)

Assignments: There will be significant laboratory/programming assignments in this course. You should consider the due date for each assignment to be a hard deadline. When the due date arrives, turn in what you have. I do give partial credit, but **late submissions are not accepted**. Submission procedures will be discussed in class.

Project: You will develop a security project during the semester. The project should involve the **demonstration** of a cyberattack, and/or **development** of a working prototype of a security solution (that can be borrowed from an existing popular tool, or a research paper, or it can be your own idea).

You will have to perform the following steps: register a team, submit a project proposal, and then a progress report and finally, project deliverables (presentation slides and demo video). You gain allocated marks for each completed step. Details are as follows:

Team Registration: (One Mark)

You will have to register your project and team members.

Proposal: (Four Marks)

Initially you will submit a **2-page proposal** for the project that I will review and approve.

The proposal **must** have the following sections:

- Objective or main idea of the project
- List of tasks along with their description, and execution and completion timeline
- Evaluation approach of the prototype to verify that your attack or solution works
- Name and student IDs of group members
- Role and work scope of each group member

You can work on the project in a team of up to three members.

Progress Report: (Three Marks)

- 50% work must be completed by the due date of this report.
- It should contain the following:
 - o Project Objectives
 - o The approach that you are working on
 - o List of tasks with their descriptions
 - o what tasks have been completed and what are left to be done.

Project Deliverables: I expect two deliverables:

1) a detailed presentation slides in pdf format **(Six Marks)**

2) a demo video **(Six Marks)**

The slides should contain

- Sufficient background information
- Project Objectives
- Details of the approach that you want to implement
- List of tasks with their descriptions
- Implementation Details
- Evaluation Results

Important Dates:

Team Registration Deadline: Feb 3

Proposal Submission Deadline: Feb 24

Progress Report Deadline: March 31

Project Submission Deadline: April 26

Class Materials: The lecture slides will be available via *Canvas*. Be sure to check the *Canvas* site frequently, <http://canvas.vcu.edu/>.

Major Topics Include:

- Computer Networks and Internet Overview
- Network TCP/IP Stack and Attacks
- Firewall, and Network Intrusion Detection and Prevention System
- Cryptographic Tools
- Network Penetration Testing Primer

Tentative Schedule:

Date	Slide set	Topics
Mon, Jan 25	Overview of Computer Security	<ul style="list-style-type: none">- CIA Triad- Computer Security Challenges and Strategy
Wed, Jan 27	Computer Networks and the Internet	<ul style="list-style-type: none">- Internet structure- Network core
Mon, Feb 1	Computer Networks and the Internet	<ul style="list-style-type: none">- Internet protocol stack

Wed, Feb 3	Application Layer Attacks	<ul style="list-style-type: none"> - Socket programming in Python - Wireshark to capture and analyze packet
	Assignment 1	- Network Application Development and Wireshark Analysis
Mon, Feb 8	Application Layer Attacks	<ul style="list-style-type: none"> - Python Programming for Hackers and Pentesters
Wed, Feb 10	Application Layer Attacks	<ul style="list-style-type: none"> - HTTP - Slowloris - Shellshock
Mon, Feb 15	Application Layer Attacks	<ul style="list-style-type: none"> - DNS: domain name system - Source Address Spoofing - Reflection & Amplification Attacks
Wed, Feb 17	Application Layer Attacks	<ul style="list-style-type: none"> - Botnet and Zeus - Rootkits (FU and <i>Basic_6</i>)
	Assignment 2	- Bot Infection Analysis
Mon, Feb 22	Application Layer Attacks	<ul style="list-style-type: none"> - Industrial Control Systems - Modbus Protocol and Vulnerabilities
Wed, Feb 24	Application Layer Attacks	<ul style="list-style-type: none"> - Subverting PLC Password Protection - Control Logic Injection Attacks - Real-world ICS Attacks
Mon, Mar 1	Transport Layer Attacks	<ul style="list-style-type: none"> - Multiplexing/demultiplexing - UDP: User Datagram Protocol
	Assignment 3	- Network Data Breach Investigation
Wed, Mar 3	Transport Layer Attacks	<ul style="list-style-type: none"> - TCP: Transmission Control Protocol - Port Scanning Attacks - TCP Reset Attack
Mon, Mar 8	Transport Layer Attacks	<ul style="list-style-type: none"> - SYN Spoofing - TCP Session Hijacking Attack
Wed, Mar 10	Transport Layer Attacks	<ul style="list-style-type: none"> - TCP Sequence Prediction Attack - Tiny Fragment Attack
Mon, Mar 15	Review before Midterm	
Wed, Mar 17	Midterm Exam	
Mon, Mar 22	Network Layer Attacks	<ul style="list-style-type: none"> - <i>Forwarding and routing</i> - IP fragmentation - Teardrop Attack
Wed, Mar 24	Reading day, no classes held	
Mon, Mar 29	Network Layer Attacks	<ul style="list-style-type: none"> - DHCP: Dynamic Host Configuration Protocol - NAT: network address translation - ICMP: internet control message protocol - Ping of Death Attack - Smurf Attack
Wed, Mar 31	Link Layer Attacks	<ul style="list-style-type: none"> - ARP: address resolution protocol - ARP Spoofing and Ettercap

Mon, Apr 5	Link Layer Attacks	<ul style="list-style-type: none"> - Ethernet switch - Ethernet CSMA/CD - MAC Flooding
Wed, Apr 7	Firewall and Intrusion Detection and Prevention System	<ul style="list-style-type: none"> - Intrusion Detection Systems - Host and Network-Based IDS
	Assignment 4	- Snort Rules
Mon, Apr 12	Firewall and Intrusion Detection and Prevention System	<ul style="list-style-type: none"> - Honeypot - Snort - Firewall
Wed, Apr 14	Cryptographic Tools	<ul style="list-style-type: none"> - Symmetric Encryption - Message Authentication
Mon, Apr 19	Cryptographic Tools	<ul style="list-style-type: none">- Kerberos
	Assignment 5	- Public Key Authentication using SSH Server
Wed, Apr 21	Cryptographic Tools	<ul style="list-style-type: none"> - Public Key Encryption - Public Key Certificate - Digital signature
Mon, Apr 26	Network Penetration Testing Primer	<ul style="list-style-type: none"> - Information Gathering - Finding Vulnerabilities
Wed, Apr 28	Network Penetration Testing Primer	<ul style="list-style-type: none">- Attacks and Exploitation
Mon, May 3	Project Demos of Selected Class Projects	
Wed, May 5	Review before Final Exam	
Mon, May 10	Final Exam	

Learning objectives/outcomes

At the end of the course, students will be able to understand network security concepts, and different cyberattacks and their countermeasures. The course will also prepare the students for advance network security courses at graduate level.

Technology Support

Engineering & VCU Resources:

- **Personal Computer Requirement:** For our current system requirements and recommendations, see: <https://egr.vcu.edu/admissions/accepted/computer-recommendations/>

- **Remote Access to Public Lab computers:** To provide remote access, we use the Citrix App2Go environment to provide full and exclusive control over "the next available" computer in the lab. See this link for more details: <https://wiki.vcu.edu/x/Oa0tBq>
- **VCU provides a lot of software available for students to download to their personal computers.** For a list of software and the specifics for each, see: <https://ts.vcu.edu/software-center/>. In particular, [Microsoft Office](#) is available free to students.
- **VCU is transitioning to Canvas.** See the Canvas Student Guide at this link: <https://community.canvaslms.com/t5/Student-Guide/tkb-p/student>
- **For IT help in the College of Engineering,** see our Wikipedia for "student" help at: <https://wiki.vcu.edu/display/EGRITHELP>
- **VCU's Technology Services (TS) provides support for "central IT" services.** If you have a technical issue with any of the following services, please submit a ticket with VCU Technology Services at <https://itsupport.vcu.edu/> or call (804) 828-2227. VCU TS maintains and supports these services and will be able to provide assistance to you.
 - VCU Cisco VPN
 - 2Factor or Dual Authentication (DUO)
 - Blackboard/Canvas
 - Gmail or other Google Apps
 - Zoom videoconferencing
 - VCU App2Go (Application server)
 - Resetting VCU password
- **For IT issues related to College of Engineering teaching and research,** email egrfixit@vcu.edu
- **For loaner Chromebooks for emergency purposes:** See this link for more details: <https://vcutsmnpc.getconnect2.com/>
